Naden: “Let’s divide responsibilities, no panic.”

“Human override successful. Your teamwork is statistically impressive.”

The team looks proud.

Naden:

“We’ve to take advantage of the great capabilities of AI not to be panic because of them”

Naden:

“See? AI helps. But it doesn’t replace us. “

Mohamed:

“At least... not today.”

SCENE 9 — Final Message (4:40 – 5:00)

Narrator (inspiring, humorous):

“AI is powerful. But creativity, intuition, empathy, and real teamwork?

That’s something only humans can do. Use AI as a tool... not a replacement.”

Prompt used to create characters

“Create a high-quality cartoon character based on the uploaded real photo. Keep the person’s original facial features, face shape, skin tone, eyes, eyebrows, and natural expression. The cartoon style should be clean, modern, and expressive, similar to Disney/Pixar character styling but still clearly recognizable as the real person.

Outfit should match their real clothing style: same colors, patterns, and accessories.

Make the background simple (solid color or soft gradient).

Ensure this cartoon character looks like the real person, with accurate likeness and respectful representation.”
